

The complex consists of ten vertical columns of different height, six crossbars 1200 mm in length and two monkey bar sections. Optionally, two or four crossbars can be re-designed to be 1758 mm in length. Monkey bar sections are fixed on different height from the ground. The length of each section is 1900 mm. The distance between the crossbars of each monkey bar is 311 mm. The complex is secured together with aluminium clamps.
